

My Dream Job

I want to be an architect when I grow up because it is an interesting job. If I become an architect, I will design interesting buildings.

Architects need to be creative so that they can design new buildings. They also need to be hard-working. They study buildings around the world so that they get lots of ideas for their designs. They need to be smart and good at drawing too.

I think this job is suitable for me because I am creative and hard-working. I am smart too. I hope I can be an architect some day.
